## CONGRESS CAN YOU HEAR US?

Two bills before Congress, known as the Protect IP Act (PIPA) in the Senate and the Stop Online Piracy Act (SOPA) in the House, are meant to stop online piracy but would censor the Web and impose harmful regulations on American businesses. Experts agree that there are better ways to shut down pirate websites than asking US companies to censor the Web. Join the groundswell of experts, organizations and people from all parts of America united in their opposition to SOPA and PIPA. Tell Congress not to censor the Web and not to cripple our innovation economy.
